Profile

Lead AI Engineer with a strong software engineering foundation and over 3 years of experience in computer software engineering, specializing in applied artificial intelligence and computer vision. I hold a Master's degree with distinction in Artificial Intelligence for Media from the UK's National Centre for Computer Animation (NCCA), ranked among the top computer animation schools worldwide.

Work Experience

Lead AI Engineer, Vita Detection, Lebanon (09-2025 - Present)

- Leading the end-to-end development and deployment of an X-ray threat detection system, improving detection accuracy by 8% while reducing inference time by 50%.
- Deployed the model as a Dockerized web service on NVIDIA Jetson edge devices and developed a lightweight CPU-only version running directly on scanner hardware.
- Leveraged Stable Diffusion for synthetic data generation to improve model robustness and worked closely with QC/QA teams to validate performance, reliability, and deployment readiness across production environments.

AI Engineer, Intern, Metaphysic.ai, United Kingdom (02-2025 – 05-2025)

- Collaborated with metaphysic.ai on an industry-led project to build a video-to-video transformation of Jennifer Lawrence into Mystique (X-Men). Helped reduce makeup preparation time by over 10 hours through AI-driven visual effects.

Software Engineer, Unilog Liban SAL, Lebanon (10-2022 – 07-2024)

- Developed and deployed a full web application of our client Socotec Infrastructure branch using Laravel, PHP and Microsoft SQL Server, project included automated data entry, dynamic data visualization and employee timetable.
- Developed the timetable mobile application for Socotec using Flutter, SQLite and Postman
- Engaged with clients throughout the project lifecycle before, during, and after development to gather requirements, conduct follow-up meetings, and address post-launch bug fixes

Software Engineer, Intern, OnCode SAL, Lebanon (06-2022 – 08-2022)

- Developed the front-end of admission section of Group Accellis' Webpage using React.JS
- Worked alongside a team, each responsible for specific tasks to deliver the final product

Software Engineer, Intern, Sconet Inc, Lebanon (06-2021 – 09-2021)

- Learned the basics of web development with HTML, CSS, JS and PHP
- Worked on mock projects: E-shopping and File transferring

Education

MS AI For Media, NCCA, Bournemouth University, United Kingdom (09-2024 – 09-2025) (Distinction)

- Research skills: Wrote a research paper on 3D object tracking techniques
- Proficiency in python machine learning frameworks such as PyTorch, TensorFlow, scikit-learn, and Numpy

BE Software Engineering, Antonine University, Lebanon (09-2019 – 09-2024)

- Software languages such as: Assembly, Python, Java, C++, SQL, Laravel, Flutter, SQL, PHP
- Hands-on experience in scalable software with web and mobile development.

Projects

- **Autonomous Vehicle Simulation, Unity, ML-Agents, C#.** Designed and built an autonomous vehicle from scratch. Implemented lane-following and traffic light recognition behaviors. Trained using Reinforcement Learning (RL).
- **6-Camera to BEV, Python, nuScenes devkit, OpenCV, Open3D.** Developed and deployed a Bird's Eye View perception model using 6-camera input from the nuScenes dataset. Reconstructed spatial representation without using LiDAR or depth sensors, significantly lowering system hardware costs.

Technical skills

- **Programming Languages:** Python, C#, PHP, SQL
- **Machine Learning:** PyTorch, Numpy, TensorFlow, OpenCV, YOLO, Open3D, scikit-learn, mmdetection3D
- **Frameworks & Tools:** Unity, FastAPI, Git, Docker, Linux, nuScenes devkit, Laravel, SQL Server, REST APIs, GitHub
- **Languages:** Arabic: Native | English: Fluent spoken and written | French: Fluent spoken and written
